# RE-BUILDING THE TITANIC

This event was designed to create a friendly yet competitive environment and foster teamwork. Teams compete in building a boat out of simple materials like cardboard and duct tape. The team's creativity and teamwork will be a part of the final score, but building the boat is only half of the task. The teams will then race their boats in a regatta; the trick is not necessarily to arrive first but to get there without sinking! This is a great activity to show the importance of each member within the company. Participants will be given a goal and will have to work together to create strategies to achieve that goal. Boats can be built anywhere where there is enough space, and the regatta can be held in the pool or at sea.
